To Whom It May Concern:

Over roughly the past year, it has been our pleasure working with the Tennessee Board of Regents by providing PreventX 24/7 Antimicrobial Surface Protectant as part of their cleaning, disinfecting and (by using the PreventX 24/7) protecting surfaces in between their typical cleaning protocol.

In addition to treating the home office of the TNBOR, upon their recommendation we have treated many of the Universities they serve. A sampling of some of the institutions are TCAT Livingston, Walter State Community College, Vol State, Austin Peay University, TCAT Livingston, Chattanooga State University, etc.

We have also had the honor of being chosen to treat the Tennessee State Capital House and Senate Chambers as well as the Cordell Hull Building which with office building for both the House of Representatives and Senate, State Comptroller, etc.

This is just a small sampling of the education and government business we have done and are still working with on a regular basis.

Please let me know if you need anything further.

Regards,
