
Directions for Using EnCapX Pro

Where to Use:

1. This product is a routine heavy-duty cleaner and degreaser for surfaces not adversely affected by water.
2. It can be used on floors and above-ground surfaces for cleaning, degreasing and to control grease buildup and reduce odors.

Supplies Needed:

1. EnCapX Pro 2/1 Gallon Bottles 16X Concentrate Part # NEEXP21G16
2. Water

Prepare Cleaning Solution for Floor Surface:

1. For routine cleaning, pour 2oz. concentrate into a 5-gallon mop bucket.
2. For heavily soiled areas, pour 4oz. concentrate into a 5-gallon mop bucket.
3. Fill bucket with water. Note: A 5-gallon bucket covers approximately 1500sq. ft. depending on the condition of the floor surface.

Mopping the Floor Surface:

1. Determine the furthest point from the room entrance and start there. Work your way back towards the room entrance in a logical manner.
2. Dip the mop into the 5-gallon bucket and wring it out over the bucket.
3. If you are using a strip or string mop, use a circular motion to mop the floor.
4. If using a sponge mop, use straight passes just like vacuuming a floor.
5. Regularly soak the mop and wring it out in the bucket.
6. If the water in the bucket becomes substantially dirty, pour it out and mix a new bucket of solution.
7. Let floor surface completely dry before use.

Cleaning Above-Ground Surfaces:

1. Pour 2oz. concentrate into a 1-quart spray bottle and fill with water. (Use 4oz. for heavily soiled areas)
2. Apply **EnCapX Pro** to the surface to be cleaned.
3. For more heavily soiled areas, allow the solution to stand on the surface for one to two minutes.
4. Scrub the surface if needed. A Microfiber or non-abrasive cloth works well for scrubbing.
5. Wipe off with a dry towel or rag.
6. When using product on surfaces with a glossy, reflective or polished finish, use a clean microfiber cloth to dry and polish the surface after initial application with rag or dry towel.
7. Repeat process as needed to achieve desired results.

Topical Applications:

1. Topical applications: Dumpster sites, concrete/asphalt, outdoor surfaces, and targeted drains.
2. Choose backpack sprayer, pump-up sprayer, or pressure washer as your applicator.
3. Dilute 2oz. concentrate for every 1 gallon of water to create a ready to apply solution.
4. Following manufacturer's recommendations on the chosen applicator, wet down targeted surfaces.
5. Wipe off with a dry towel or rag as needed.
