

Introducing **PreventX 24/7™ Antimicrobial Surface Protectant** an all surface durable protection barrier that imparts biostatic activity to surfaces to protect the surface against odor-causing bacteria, mold, mildew and algae reducing corporate liability, making future cleanings easier, while extending the life of your surfaces.

Top benefits of long-lasting antimicrobial surface protection:

- An affordable, fast and convenient spray and wipe application that is available in concentrate up to 3X and in ready-to-use.
- Independent studies have shown the active ingredient in **PreventX 24/7™** to be effective against many different microorganisms including bacteria, mold, mildew and fungi.
- **PreventX 24/7™** is an EPA registered antimicrobial (EPA Reg. No. 91116-1).
- Typical disinfectants work while wet, but once the product dries there is no further protection and the treated surface is ready for re-contamination. **PreventX 24/7™** will continue to protect your surfaces against germs, mold, and mildew for 30 to 90 days depending on surface use.
- Reduces ATP scores for added safety compliance.

with **PreventX 24/7™**.

- **PreventX 24/7™** Provides a protective finish that bonds to the surface, not destroyed by normal daily cleaning.
- **PreventX 24/7™** provides continuous surface protection in between cleaning and disinfecting events.
- Microscopic "carbon spikes" penetrate the cells and destroy the organisms.
- **PreventX 24/7™** environmental green technology is non-toxic, non-leaching, non-hazardous, and will not promote the growth of superbugs.
- **PreventX 24/7™** is approved for fabrics and so much more.

Sanitizing and Disinfecting – Required but is it Enough?

Surfaces treated with sanitizers and disinfectants are free of microorganisms for only the brief period of time from when your sanitizer/disinfectant is applied to when it dries.

Your surface is NOT protected between Sanitizing and Disinfecting cleaning events!

Surface cross-contamination occurs throughout the day and night everywhere through droplets, direct surface contact and airborne transmission.

Limited Surface Protection when you sanitize/disinfect 4 times daily

- Up to 40 minutes of Surface Protection
- Surfaces are protected 2.8% of the time in a 24-hour period
- **ARE YOUR SURFACES REALLY PROTECTED?**

Surface Protection using PreventX 24/7™ Antimicrobial

Microorganisms cannot exist on a **PreventX 24/7™** treated surface and cannot thrive in-between sanitizing and disinfecting events ensuring maximum surface protection.

Surface cross-contamination, regardless of type, is significantly reduced everywhere **PreventX 24/7™** is used.

Extended Surface Protection Using PreventX 24/7™

- Surface Protection 24 hours 7 days a week
- One application protects surface up to 90 days
- Implement one of the **NewEraSOS** antimicrobial programs, and **MAXIMIZE SURFACE PROTECTION**
