

**PreventX CCP** is a cleaning solution and protectant for fabrics. NewEraSOS brings you an easy to apply fabric cleaning product that will protect your fabric at the fiber level offering many benefits:

- Fabrics will require less cleaning
- Extend the life of your fabric
- Fabric will remain and appear clean longer
- Use on carpet, upholstery, curtains, and furniture
- Dry dirt and dye will not embed into the fiber

Most cleaning protectants in the marketplace come with a Scotchgard type protection against water and oils. **PreventX CCP** takes this protection to another level! **PreventX CCP** is designed to block available fabric dye receptors that, if left unprotected, accepts unwanted dyes from fruit drinks, coffees, red wine, mustard, catsup, medicines and other products that are harmful to the fabric.

Routine cleaning with **PreventX CCP** will ensure that your fabric at the fiber level will be protected against those nasty dye's and continuous dry dirt that is exposed to fabrics daily.

### Features and Benefits:

- Cleans and protects nylon, wool, polyester and polypropylene
- Forms an invisible shield around each fiber
- Eliminate those reappearing fabric stains
- Fibers will no longer attract dry dirt and soil
- Long-term protection even when spills are not treated immediately
- Residue will not be left behind after cleaning
- Ideal spot cleaner after a spill
- Product comes in a concentrate, simply hook or pour directly into applicator or dilute and make up your own ready-to-use containers
- Nearly neutral pH
- Safe for all stain-resistant carpet, upholstery fabrics and other fabrics
