

Directions for Cleaning Surfaces with Dr. KlarX+™

Where to Use:

1. This product is a heavy-duty cleaner and degreaser for surfaces not adversely affected by water.
2. This product is ideal for many different industries including lodging/hospitality, healthcare, food processing, automotive, transportation, childcare, education, commercial buildings, gaming, religious, government, recreation, and so much more.
3. Use on surfaces with soap scum, tough grease, oils, built-up grime, heavy soils and many more.
4. This product contains 0.125 % active in solution (dilution ratio of 3:32) of PreventX 24/7™ to make surface more durable and to reinforce the antimicrobial surface protection every time you clean.

Supplies Needed:

1. **Dr. KlarX+™** 2ea/1-Gallon Containers of 10X Concentrate - Part Number: NEKCP21G10
2. Water & spray applicator
3. Cloth types: Paper towels or microfiber cloth or other lint-free non-abrasive cloth.
4. Non-Abrasive Pads: Non-abrasive / Non-scratch brillo pads or scouring sponge

Prepare Cleaning Solution

1. 3oz of 10X concentrate shall be added to 29oz of water to create a 32oz ready to use solution.
2. Mop Buckets:
 - a. For lightly soiled areas, pour 3oz. of concentrate solution into a 5-gallon mop bucket.
 - b. For heavily soiled areas, pour 4-6oz. of concentrate solution into a 5-gallon mop bucket.
 - c. Fill bucket with water. **Note:** A 5-gallon bucket covers approximately 1500sq. ft. depending on the condition of the floor surface.

Surface Cleaning:

1. Prepare the cleaning solution.
2. Apply **Dr. KlarX+™** to the surface to be cleaned.
3. For more heavily soiled areas or for soap scum removal, allow the solution to stand on the surface for one to two minutes.
4. Scrub the surface as needed to remove soils or soap scum. A Microfiber cloth or non-abrasive pad works well for scrubbing.
5. Wipe off with a clean dry towel or rag.
6. When using on floors with a mop-bucket, allow surface to dry before use.
7. When using product on surfaces with a glossy, reflective or polished finish, use a clean microfiber cloth to dry and polish the surface after initial application with rag or dry towel.
8. Repeat process as needed to achieve desired results.

Tips:

1. Previous cleaners may leave an invisible residue on the surface that will eventually be removed by the heavy-duty **Dr. KlarX+™**.
 2. Utilize our routine daily cleaner, **Dr. KlarX+™** to ensure that you are not leaving behind residues.
