

NewEraSeal™ Wonder Walk

NewEraSeal™ Wonder Walk employs a proprietary water-based fusion of nanotechnology-sized polymeric particulates, **NewEraSeal™ Wonder Walk** protectant works on hard surfaces to seal, protect, enhance appearance, and extend asset life. **NewEraSeal™ Wonder Walk** also utilizes nano-metal oxides to densify and strengthen surfaces without hardening to further enhance UV protection and surface protection. **NewEraSOS™** has successfully combined two emerging technologies to address multiple problems of surface protection against corrosion, soil adhesion, atmospheric fouling, abrasion, static, and UV degradation with “liquid glass” penetrating sealing.
