

NewEraLube™ Nano Gun Lube

NewEraLube™ Fuel Additive is an advanced formulation designed to enhance fuel quality and engine performance across gasoline, diesel, biodiesel, and hybrid systems. Utilizing next-generation macromolecular technology, it optimizes fuel stability in storage tanks, preventing gelling in cold temperatures and preserving octane levels over time. Ideal for construction and agricultural fuel reserves, NewEraLube™ Fuel Additive ensures reliable efficiency in demanding conditions.

Engineered as a concentrated detergent, **NewEraLube™ Fuel Additive** effectively dissolves combustion-chamber deposits, intake-valve residue, and port fuel-injector buildup. This process restores power, improves fuel economy, and enhances overall drivability, particularly in low-mileage engines. By maintaining peak engine efficiency, it minimizes reliance on higher-octane fuel, reduces emissions, and promotes smoother operation for sustained performance.

Features

- Maximizes fuel efficiency
- Removes organic particles
- Prevents fuel gelling
- Preserves octane levels
- Deep cleans deposits
- Ideal for emissions tests
- Works with all fuels

Benefits

- Maximizes fuel efficiency
- Removes organic particles
- Prevents fuel gelling
- Preserves octane levels
- Deep cleans deposits
- Ideal for emissions tests
- Works with all fuels

- **Size:** 4/1-gal, Pails, Drums, and Totes
- **Appearance:** Clear Liquid
- **Flash Point:** 105°
- **Stability:** Stable
