

NewEraAgri™ Herbicide Catalyst

NewEraAgri™ Herbicide Catalyst is a next-generation adjuvant engineered to amplify the performance of pre-emergent herbicides. Powered by proprietary nanotechnology, it transforms the physical characteristics of the spray solution—reducing surface tension, optimizing particle size, and enhancing herbicide-plant interaction. This results in faster leaf penetration, improved absorption, and superior weed control across both perennial and annual species, especially in Roundup Ready crops.

Designed for compatibility with most herbicide programs, **NewEraAgri™ Herbicide Catalyst** delivers eco-friendly chemistry and multi-functional efficiency without the need for additional surfactants. Its nano-enhanced formula improves rain fastness, minimizes photodegradation, and ensures consistent coverage even under challenging field conditions. Whether you're targeting tough weeds or fine-tuning spray performance, this catalyst sets a new standard for herbicide activation.

Features

- Nano-enhanced spray chemistry
- Eco-friendly, safe formulation
- Optimized particle size control
- Reduced spray surface tension
- Multi-functional adjuvant design
- Stable pH performance support
- Fast leaf penetration capability
- Rain-fastness enhancement technology
- Broad herbicide program compatibility
- No additional surfactants required
- Improved droplet spread behavior
- Designed for Roundup systems
- Clean, concentrated product formula
- Consistent tank-mix stability

Benefits

- Stronger herbicide absorption efficiency
- Faster penetration into foliage
- Improved perennial weed control
- Enhanced annual weed suppression
- Reduced sunlight herbicide breakdown
- Better coverage across leaves
- Increased rain-resistant performance
- More consistent field results
- Simplified tank-mix process
- Lower additive program costs
- Optimized spray pattern uniformity
- Reliable performance in variability
- Greater herbicide activation power
- Cleaner, safer handling experience

Sizes: 4x1-gal, 55-gal, 275-gal

Appearance: Amber to Clear

Odor: Slightly Earthy

pH: 5.5 – 6.5

Storage: 55°F to 75°F

Other: Non-Hazardous, Non-Flammable, Ozone-Safe, Contains No VOC's
